CEO Commitment Letter to Small Businesses

At Two Six Technologies (TST), we recognize the important role small businesses hold both in our community and in meeting our customer missions. Their unique insights, specialized capabilities, and agility are valuable assets that drive innovation and progress.

As a newly minted large business, we remain steadfast in our commitment to fostering an inclusive business environment. We fully support efforts to provide maximum practicable opportunities for small business concerns.

Here are key highlights of our engagement with the small business community in 2025:

- Over 75% of our federal spending was dedicated to small businesses
- Met or exceeded ambitious small business goals across our project portfolio
- More than doubled DOD-related spending with small businesses

Our support for small business suppliers extends beyond statistics:

- We engage in small business outreach events, identifying new vendors for subcontracting and procurement opportunities
- Our internal policies and procedures are tailored to encourage small business participation, ensuring our commitment is reflected in daily operations
- We pass these requirements to our business partners by incorporating them into our subcontract terms and conditions and our supplier code of conduct

TST is dedicated to fostering relationships with small businesses. We don't just contract with small businesses; we partner, invest, and grow with them.

For inquiries or further information on collaboration opportunities, our small business liaison officer (SBLO) can be reached at smallbusiness@twosixtech.com.

Joe Logue
Chief Executive Officer
Two Six Technologies
